15. Pod **Publication Path** moramo najprej vpisati pot do katalogov **W:\katalogi** (na sliki podčrtano s črnim) in nato sledi še ime kataloga. Pri imenu (na sliki označeno z rdečim) moramo paziti da **ne vpisujemo šumnike ali presledke** (namesto presledke uporabljamo počrtaje _ ali minuse -). Ko vpišemo pravilno pot pritisnemo na gumb **Start**

16. Ko nam program objavi katalog je ta dostopen na povezavi: <u>http://hartis.si/katalogi/FAVORIT/index.html</u>. Pisava z rdečim je za vsak katalog različna (predstavlja ime kataloga), pisava s plavo barvo pa je vedno enaka.
